Objective

A highly motivated graduate with a strong foundation in **data analysis, statistics, and SQL**. Passionate about working with data, creating insights, and learning new tools like **Power BI, Tableau** to help make better decisions. Eager to apply analytical skills and grow in the field of data analytics.

Technical Skills

- **Programming Languages:** PYTHON(Core and Advanced)
- **Web Technologies:** HTML,CSS,JAVASCRIPT.
- **Frameworks and Libraries:** DJANGO(Basic), NumPy, Pandas.
- **DataBase Management:** SQL, PostgreSQL, MongoDB.
- **Data Visualization:** Creating charts and dashboards using Power BI, Tableau, or Excel.
- **Data Structures and Algorithms:** Lists, Tuples, Dictionaries, Stack and Arrays.
- **Design Tools:** Adobe Photoshop, Canva, Figma

Soft Skills

- **Problem-Solving:**Ability to analyze and interpret data effectively.
- **Critical Thinking:**Making data-driven decisions and deriving insights.
- **Communication Skills:**Presenting findings in a clear and simple manner.
- **Attention to Detail:**Ensuring data accuracy and quality.
- **Adaptability and Learning:** Willingness to learn new tools and techniques in data analytics.

Education

Annamacharya Institute of Technology and Sciences , Rajampeta	Sept 2019- Apr 2023
• CGPA: 8.63/10.0 • Coursework:Bachelor of Technology (Computer Science and Engineering)	
Sri Chaitanya Junior College , Vijayawada	April 2017- Feb 2019
• CGPA: 9.94/10.0 • Coursework: Intermediate(MPC)	
A.P Model School , Yadiki	April 2016- Feb 2017
• CGPA: 9.3/10.0 • Coursework: SSC	

Certifications

- **AWS Certified Cloud Practitioner** - Covers cloud concepts, security, pricing, and AWS services.
- **Python Certification by Hacker Rank** - Covers Python Basics,Modules and libraries like NumPy,Pandas and Matplotlib.

Projects

Title : Ensuring the Security of Logistics Information and Data Querying using Searchable Encryption Algorithms and Blockchain

Jan 2022 - Jan 2023

Description : The purpose of this project is to develop software that mainly combines with the characteristics of blockchain and searchable encryption algorithms for logistics security and efficient data querying that can be used in a wide variety of places.

- Technologies Used: HTML, CSS, PYTHON, XAMPP, and SQL
- Key Features: Mobile responsiveness, interactive UI, optimized loading time.

Amazon Sales Analytics Dashboard

- Amazon Sales Analytics Dashboard in Power BI provides a comprehensive view of sales performance, revenue trends, and customer insights. It enables data-driven decision-making by visualizing key metrics such as order volume, profit margins, and regional sales distribution.
- Tools Used: Power BI, Power Query

Workshops

Amazon Web Services Certification by APSSDC

Jan 2022- Sep 2022

Game designing using build box Certification by APSSDC

Power BI Workshop with a Real-Time Project by Jobaaj Learnings Group

Languages

- **English** - Fluent
- **Telugu** - Native
- **Hindi** - Intermediate

Hobbies

- Dancing
- Reading Books
- Singing
